PROFILE

Diligent, organised, and skilled in software design, installation, and testing. Proficient in multiple platforms, languages, and embedded systems. Effective self-manager and team player with excellent communication. Committed to advancing my professional growth.

EMPLOYMENT HISTORY

Software Developer, Tracware Ltd

Remote

May 2023 — Present

As a Software Developer at Tracware LTD, I specialize in front-end development and bring extensive expertise in web development and UI/UX design. My role involves creating dynamic and user-friendly websites using a variety of technologies, including WordPress, Webflow, and core HTML. Additionally, I have been responsible for the comprehensive redevelopment of the front-end for Adminitrac, an issue tracking software accessible at Adminitrac.com.

- Designed and developed notable websites, including Ployon.com, Tracwareinfobot.com, and Adminitrac.com.
- Successfully led the front-end redevelopment of Adminitrac, enhancing its usability and performance:
- Collaborated effectively within a small team of developers.
- Proven ability to work independently, demonstrated through the solo redevelopment of Adminitrac's front end.
- Actively engaged in continuous learning and research to address knowledge gaps, ensuring up-to-date expertise in the field.

Junior Software Engineer, Trinity Workshops

Wethersfield, UK

Oct 2022 — Mar 2023

I created testing schemes for our products, also designed and uploaded our firmware to our products using J-Link products. I also acted as a general operative at the company. This entails:

- Building up PCB boards
- Physically building the products
- I have also designed and developed a new website for the company

Junior Software Developer, HoneyPot Dating Ltd

Aldgate, London

Sep 2022 — Oct 2022

During my short tenure at HoneyPot Dating, I worked on a dating application called Thursday. I was being trained for the role of full-stack developer. However, I was let go due to the company being unable to acquire Series A funding. My role meant I did the following:

- I worked on both the back-end and front-end, in JS and TS.
- I created a range of useful development tools for the back office software and the application itself.
- Utilised new technologies like APIs and AWS.

- Performed regular bug hunts.

Temporary Project Developer, Villar and Warner Ltd. Chelmsford, Essex

Apr 2022 — Jul 2022

During my 4 month tenure with Villar and Warner Ltd, I worked on Project Mercury, a range of professional software serving the insurance industry. I held the position of Project Manager, Lead Developer and Lead Designer. I was a one man team working on a range of cross-platform mobile applications, web applications and back-end tools.

- I utilised the latest software development tools, techniques, and approaches.
- Brought forth a passion and dedication to software development.
- Created, communicated, and managed project plans.
- Worked to continually meet the expectations of shareholders and users.

EDUCATION

BTEC Level 3 Extended Diploma in Games Development, Chelmsford College

Chelmsford, Essex

Sep 2018 — Jun 2020
