Adaptable, organized and skilled in software design. Proficient in multiple languages, effective self-manager and team player with excellent communication skills. Committed to advancing my professional growth.

EMPLOYMENT HISTORY

Full Stack Designer, Tracware Ltd

May 2023 - Present

Remote

As a Full Stack Designer, I specialize in product design/UI and front-end development. My role involves creating approved designs for dynamic and user-friendly products using a variety of technologies. Some key achievements:

- Successfully wrapped up the facelift/upgrade, in design and front-end development for **Adminitrac**. This involved: Crafting concept UI/UX designs using Figma and developing the approved designs using HTML/CSS, JS and VB.NET.
- Acted as the **Principal Web Designer** designing, developing and managing websites using WordPress (Elementor, ACF, PHP, JS, HTML/CSS) and Webflow.
- Took on the role of the principal Front-End Developer, leading the development efforts to enhance user experience and functionality for **AWI**.
- I became the **primary resource** for all of our concept UI/UX & product design, ensuring our projects meet high standards of usability and aesthetics (in line with our marketing directive).

Junior Software Engineer, Trinity Workshops

Oct 2022 - Mar 2023

Wethersfield, UK

I created testing schemes for our products, designed and uploaded the firmware to the products using J-Link products. I also acted as a general operative at the company.

This entailed:

- Building up the PCB Boards for the products.
- Physically assembling the products.
- Designed and built a website for the company based around advanced security requirements.

Temporary Project Lead, Villar and Warner Ltd

Apr 2022 - Aug 2023

Chelmsford, UK

I worked with and built a range of professional software(s) serving the insurance industry. This included:

- Worked with the latest software development tools, techniques, and approaches.
- Created, communicated, and managed project plans.
- Worked to continually meet the expectations of shareholders and users.
